List of Contents

NUMBER 1

Ioan Pop, **Rama Subba Reddy Gorla** and **Majid Rashidi**	1	The effect of variable viscosity on flow and heat transfer to a continuous moving flat plate
Karen Ames and **Brian Straughan**	7	Continuous dependence results for initially prestressed thermoelastic bodies
S. Roy and **G. Nath**	15	Unsteady laminar compressible boundary layers with vectored mass transfer and an applied magnetic field
X. Wang and **Y. N. Gong**	25	An elastodynamic solution for multilayered cylinders
I. Pop, M. Kumari and **G. Nath**	35	Free convection about cylinders of elliptic cross section embedded in a porous medium
E. Kröner and **D. C. Lagoudas**	47	Gauge theory with disclinations
Zhanjun Gao and **Toshio Mura**	55	Nonelastic strains in solids—an inverse characterization from measured boundary data
O. P. Chandna and **P. V. Nguyen**	69	Hodographic study of MHD constantly inclined fluid flows
G. J. Weng	83	Explicit evaluation of Willis' bounds with ellipsoidal inclusions
George Treviño and **Jiajin Qu**	93	Three-point velocity correlation for grid-turbulence
F. K. Labisch	101	On shearable nonlinearly elastic rings

NUMBER 2

Samit Roy, Arlo F. Fossum and **Robert J. Dexter**	119	On the use of polar decomposition in the integration of hypoelastic constitutive laws
John G. Papastavridis	135	On Jourdain's principle
M. Sinasi Göğüş	141	The influence of a longitudinal vibrating pipe on Poiseuille flow of a binary mixture
Yishi Duan and **Shengli Zhang**	153	Topological current structure of disclinations in the 4-dimensional gauge field theory of dislocation and disclination continuum
Gelu I. Paşa and **Dan Poliševski**	161	Instability of interfaces in oil recovery
Fiona H. Kerr	169	The scattering of a plane elastic wave by spherical elastic inclusions
Fiona H. Kerr	187	An effective medium approach to the study of plane wave propagation in an elastic matrix with spherical elastic inclusions

M. K. Kuo 199 Transient stress intensity factors for a cracked plane strip under anti-plane point forces

Jeremiah G. Murphy and **Francis J. Rooney** 213 Rotation of cylinders of special compressible materials

J. N. Sharma and **Dayal Chand** 223 On the axisymmetric and plane strain problems of generalized thermoelasticity

K. M. Deng, C. W. Lung and **K. L. Wang** 231 A gauge field theory of dislocations and disclinations with irreversible processes

V. S. Mitlin and **L. I. Manevitch** 237 Nonlinear dynamics of phase transition in dense viscous media

K. N. Rai and **S. Rai** 247 An analytical study of the solidification in a semi-infinite porous medium

Letters in Applied and Engineering Sciences

I. Pop and **P. Cheng** 257 Flow past a circular cylinder embedded in a porous medium based on the Brinkman model

NUMBER 3

N. Gupta, V. D. Sharma, R. R. Sharma and **B. D. Pandey** 263 Propagation of rapid pulses through a two-phase mixture of gas and dust particles

N. G. Kafoussias 273 Effects of mass transfer on free convective flow past a vertical isothermal cone surface

E. Smith 283 The use of eta factors to describe the J-integral for a multiple loading state

E. Smith 295 J_D versus J_M

Liliana Restuccia and **Gerrit Alfred Kluitenberg** 305 On the heat dissipation function for dielectric relaxation phenomena in anisotropic media

D. Ieşan 317 A theory of mixtures of nonsimple elastic solids

V. L. Popov 329 Gauge theory of "plastically incompressible" medium without dissipation—I. Dispersion relations and propagation of perturbations without dissipation

V. L. Popov and **N. V. Tshertova** 335 Gauge theory of "plastically incompressible" medium —II. Dispersion relations with dissipation

B. N. Mandal and **Sudeshna Banerjea** 341 On waves due to rolling of a submerged nearly vertical plate

Rama Subba Reddy Gorla 349 Mixed convection in a micropolar fluid from a vertical surface with uniform heat flux

B. Mukhopadhyay and **R. K. Bera** 359 Effect of thermal relaxation on electro-magnetic-thermo-visco-elastic plane waves in rotating media

M. S. Malashetty and **V. Leela** 371 Magnetohydrodynamic heat transfer in two phase flow

E. H. Twizell, S. A. Matar, D. A. Voss and **A. Q. M. Khaliq** 379 Explicit numerical methods with enhanced stability properties for first-order autonomous initial-value problems

Letters in Applied and Engineering Sciences

Kamran Mohseni and **Abdullah Shidfar** 393 Some inverse problems with explicit solutions

A. N. Das and **P. K. Chaudhuri** 397 A note on boundary elements for micropolar elasticity

M. A. Brutyan and **P. L. Krapivsky** 401 On the stability of periodic unidirectional flows of micropolar fluid

NUMBER 4

S. R. Kasiviswanathan and **M. V. Gandhi** 409 A class of exact solutions for the magnetohydrodynamic flow of a micropolar fluid

K. Viswanathan and **U. Sharma** 419 Stress concentration due to a finite rigid ribbon in the presence of a finite crack—II. SH case

R. M. Sullivan and **N. J. Salamon** 431 A finite element method for the thermochemical decomposition of polymeric materials—I. Theory

P. V. Nguyen and **O. P. Chandna** 443 Non-Newtonian MHD orthogonal steady plane fluid flows

A. V. Shenoy 455 Darcy natural, forced and mixed convection heat transfer from an isothermal vertical flat plate embedded in a porous medium saturated with an elastic fluid of constant viscosity

Bruno Carbonaro 469 Wave propagation in a modified theory of viscous fluid dynamics

I. Suliciu 483 Some stability–instability problems in phase transitions modelled by piecewise linear elastic or viscoelastic constitutive equations

I. Suliciu 495 The relative free energy and energy estimates in modelling phase transitions by rate-type constitutive equations

M. C. Néel 507 Inhomogeneous boundary conditions and the choice of the convective patterns in a porous layer

M. Pakdemirli and **E. S. Şuhubi** 523 Boundary layer theory for second order fluids

B. Lazzari and **E. Vuk** 533 Constitutive equations and quasi-static problem in linear thermoviscoelasticity

Dominic G. B. Edelen 545 Monge–Ampere waves in a 1-dimensional elastic medium

NUMBER 5

D. N. Riahi 551 Directional solidification of a binary alloy with deformed melt–crystal interface and hydromagnetic effects

D. C. Sanyal and **S. Bhattacharyya** 561 Similarity solutions of an unsteady incompressible thermal MHD boundary layer flow by group theoretic approach

Xu Li 571 A generalized theory of thermoelasticity for an anisotropic medium

G. Ünal and **E. S. Şuhubi** 579 A local analysis of the Kolmogorov–Spiegel–Sivashinsky equation

G. Ünal and **E. S. Şuhubi** 593 Travelling waves and chaos in the Kolmogorov–Spiegel–Sivashinsky model

M. Pakdemirli and **E. S. Şuhubi** 611 Similarity solutions of boundary layer equations for second order fluids

N. P. Gopalan and **R. Ponnalagarsamy** 631 Investigation on laminar flow of a suspension in corrugated straight tubes

Dinesh Kumar, Prawal Sinha and **Peeyush Chandra** 645 Ferrofluid squeeze film for spherical and conical bearings

Iulian Beju 657 A uniqueness theorem in thermoelasticity with thermal relaxation

M. Şinasi Göğüş 665 The steady flow of a binary mixture between two rotating parallel non coaxial disks

S. Pennisi 679 On third order tensor-valued isotropic functions

NUMBER 6

G. Ramanaiah and **V. Kumaran** 693 Natural convection about a permeable cone and a cylinder subjected to radiation boundary condition

E. S. Şuhubi 701 Similarity solutions for plane waves in hyperelastic materials

Layachi Hadji 717 Cellular interfacial patterns in the Rayleigh–Bénard problem with phase change

Stanislaw J. Matysiak 729 On the homogenized model of periodic stratified fluid-saturated porous solids

F. Franchi and **B. Straughan** 739 A nonlinear energy stability analysis of a model for deep convection

V. Rajeswari and **G. Nath** 747 Unsteady flow over a stretching surface in a rotating fluid

Da Yu Tzou 757 The transonic temperature wave around a rapidly propagating crack tip: an experimental evidence

Hilmi Demiray 771 Torsional waves in a stressed elastic tube filled with a viscous fluid

Biao Wang 781 Three-dimensional analysis of a flat elliptical crack in a piezoelectric material

S. Roy and **G. Nath** 793 Unsteady hypersonic boundary layers for slender axisymmetric bodies with large injection rates

A. Cemal Eringen 805 Balance laws of micromorphic continua revisited

Rajneesh Kumar and **M. L. Gogna** 811 Steady-state response to moving loads in micropolar elastic medium with stretch

Announcements I

NUMBER 7

Jan Saczuk 821 Extensions of the Legendre transformation

I. Demir, J. P. Hirth and **H. M. Zbib** 829 The extended stress field around a cylindrical crack using the theory of dislocation pile-ups

K. R. Sundaresan and **M. S. Ananth** 847 On unsteady state moving boundary problems for non-plane geometries

Hany H. Sherief 861 Fundamental solution for thermoelasticity with two relaxation times

M. Manjunath and **R. P. Chhabra** 871 Free rise velocity of a swarm of spherical gas bubbles through a quiescent power law liquid

A. Roy and **M. Chatterjee** 879 An elliptic crack in an elastic half-space

Xiangyue Li and **Xiangwei Li** 891 On the thermoelasticity of multicomponent fluid-saturated reacting porous media

Giuseppe Saccomandi 913 Body loadings equivalent to a seismic dislocation in thermo-microstretch elastic solids

J. P. Zhang and **K. R. Rajagopal** 919 Some inhomogeneous motions and deformations within the context of a non-linear elastic solid

R. M. Sullivan and **N. J. Salamon** 939 A finite element method for the thermochemical decomposition of polymeric materials—II. Carbon phenolic composites

Mehrdad Negahban and **Alan S. Wineman** 953 Modeling the mechanical response of a material undergoing continuous isothermal crystallization

NUMBER 8

Siegmund Schwarz 963 Electromagnetic forces and the energy-momentum tensor in the presence of electric polarization and magnetization

T. C. Chew and **R. E. Britter** 983 Effect of flame-induced geometrical straining on turbulence levels in explosions and common burner configurations

Kalpana Tewari and **Punyatma Singh** 1003 Natural convection in a thermally stratified fluid saturated porous medium

R. Jayachandran and **R. C. Batra** 1009 Steady state axisymmetric deformations of a thick elastic–thermoviscoplastic target

D. M. Haughton 1027 Boundary layer solutions for incompressible elastic cylinders

J. De and **B. Patra** 1041 Thermoelastic problem of an orthotropic elastic plane containing a cruciform crack

O. P. Bhutani and **K. Vijayakumar** 1049 On the isogroups of the semilinear hyperbolic equation $u_{xt} = f(u)$ and its exact solutions for the case of the Liouville equation

Huajian Gao 1061 Diffusion or imperfection modified long range interaction between a line dislocation and a spherical inclusion

Chih-Bing Ling 1073 A concentrated force inside a thick plate

K. N. Mehta and **Shobha Sood** 1083 Transient free convection flow with temperature dependent viscosity in a fluid saturated porous medium

NUMBER 9

George Z. Voyiadjis and **Peter I. Kattan** 1089 A plasticity-damage theory for large deformation of solids—I. Theoretical formulation

H. S. Onur and **E. Baydar** 1109 Laminar channel flow over a square step

Y. Qin and **P. N. Kaloni** 1117 A thermal instability problem in a rotating micropolar fluid

Stefan Blenk, Harald Ehrentraut and **Wolfgang Muschik** 1127 Macroscopic constitutive equations for liquid crystals induced by their mesoscopic orientation distribution

A. G. Youtsos 1145 Propagation of EM waves through a moving optically active slab

J. A. Hawkins and **A. Bedford** 1161 Variational theory of bubbly media with a distribution of bubble sizes—I. Liquids

J. A. Hawkins and **A. Bedford** 1177 Variational theory of bubbly media with a distribution of bubble sizes—II. Porous solids

Peter Wolfe 1187 The effect of bending stiffness on inextensible cables

Bigyani Das 1193 Flow of a Bingham fluid in a slightly curved tube

K. R. Rajagopal and **L. Tao** 1209 Wave propagation in elastic solids infused with fluids

Letters in Applied and Engineering Sciences

I. A. Kunin, F. Hussain and **X. Zhou** 1233 Stability of the 4-vortex system

I Announcement

NUMBER 10

THE ERINGEN ANNIVERSARY ISSUE

ix Preface

xi Dedication

xiii List of Publications by A. Cemal Eringen

Part I: Solid Mechanics

Ian N. Sneddon 1237 On Muki's solution of the equations of linear elasticity

K. R. Rajagopal and **J. P. Zhang** 1247 Secondary deformation due to axial shearing of a cylinder of non-circular cross-section

J. Casey and **P. M. Naghdi** 1257 A prescription for the identification of finite plastic strain

Elias C. Aifantis 1279 On the role of gradients in the localization of deformation and fracture

G. Kerr, G. Melrose and **J. Tweed** 1301 The disturbance of a uniform heat flow by a line crack in an infinite anisotropic thermoelastic solid

J. L. Nowinski 1315 On the internal instability of an infinite three-dimensionally stressed highly elastic medium

Part II: Fluid Mechanics

Rui-Xiu Dai, Q. Dong and **A. Z. Szeri** 1323 Flow between eccentric rotating cylinders: bifurcation and stability

L. E. Payne 1341 Some remarks on ill-posed problems for viscous fluids

F. Franchi and **B. Straughan** 1349 Nonlinear stability for thermal convection in a micro-polar fluid with temperature dependent viscosity

A. D. Kirwan Jr, Bruce Lipphardt Jr and **Juping Liu** 1361 Negative potential vorticity lenses

C. G. Speziale and **S. Thangam** 1379 Analysis of an RNG based turbulence model for separated flows

Part III: Mathematical Physics

Dominic G. B. Edelen 1389 A 1-dimensional elastic model with time translation gauge invariance

Tom Chang 1401 Path integrals, differential renormalization-group, and stochastic systems near criticality

D. F. Nelson 1407 Wave momentum

Laurence I. Gould 1417 Nonlocal generalized angular-momentum balance laws and equations of motion

B. S. Berger, M. Rokni and **I. Minis** 1433 The nonlinear dynamics of metal cutting

Part IV: Electromagnetic Media

G. A. Maugin, M. Epstein and **C. Trimarco** 1441 Theory of elastic inhomogeneities in electromagnetic materials

P. N. Kaloni 1451 Some remarks on the boundary conditions for magnetic fluids

Sitiro Minagawa 1459 Energy and energy-factor of infinite straight charged-dislocations in an anisotropic piezoelectric crystal

A. O. Barut 1469 Nonlinear nonlocal classical field theory of quantum phenomena

Kazuo Kondo 1475 Galois field theoretical approach to the dislocational and disclinational aspects of the musical lattice

Part V: Multiphase and Structured Continua

Sameer Abu-Zaid and **Goodarz Ahmadi** 1483 A stress transport model for rapid granular flows in a rotating frame

Flavio Dobran 1497 Modeling of structured multiphase mixtures

Fazil Erdogan and **Murat Ozturk** 1507 Diffusion problems in bonded nonhomogeneous materials with an interface cut

Masao Satake 1525 A discrete-mechanical approach to granular materials

Jovo P. Jaric 1535 On a transport theorem for moving interface

T. Atarashi and **S. Minagawa** 1543 Transient coupled-thermoelastic problem of heat conduction in a multilayered composite plate

Part VI: Closing Comments and Reflections of A. Cemal Eringen

A. Cemal Eringen 1551 Vistas of nonlocal continuum physics

xxxvi The Eringen Symposium Participants

NUMBER 11

Chenmin Ma and **Tomasz Hueckel** 1567 Effects of inter-phase mass transfer in heated clays: a mixture theory

A. Wineman and **K. R. Rajagopal** 1583 Shear induced redistribution of fluid within a uniformly swollen nonlinear elastic cylinder

M. Vasudevaiah and **R. Patturaj** 1597 Heat convection from a spinning sphere

Hilmi Demiray 1607 Wave propagation through a viscous fluid contained in a prestressed thin elastic tube

E. Smith 1621 The J_M crack growth resistance curve expressed in terms of eta factors

H. S. Paul and **V. M. Murali** 1629 Wave propagation in a cylindrical poroelastic bone with cavity

S. K. Tomar and **M. L. Gogna** 1637 Reflection and refraction of a longitudinal microrotational wave at an interface between two micropolar elastic solids in welded contact

Reaz A. Chaudhuri and **Humayun R. H. Kabir** 1647 A boundary-continuous-displacement based Fourier analysis of laminated doubly-curved panels using classical shallow shell theories

M. B. Rubin 1665 Hyperbolic heat conduction and the second law

NUMBER 12

S. H. Lin	1677	Nonlinear water diffusion in unsaturated porous solid materials
K. A. Lindsay and **B. Straughan**	1683	Penetrative convection in a micropolar fluid
Abdel Raouf F. Elhefnawy	1703	Kelvin–Helmholtz instability in magnetic fluids with surface adsorption: linear and nonlinear theory
A. Romano and **E. S. Şuhubi**	1715	Structure of Weiss domains in ferroelectric crystals
L. G. Hector Jr, W.-S. Kim and **M. N. Özisik**	1731	Hyperbolic heat conduction due to a mode locked laser pulse train
A. A. Arafa and **Rama Subba Reddy Gorla**	1745	Mixed convection boundary layer flow of a micropolar fluid along vertical cylinders and needles
Claude Vallée	1753	Compatibility equations for large deformations
Glenn Ledder and **J. David Logan**	1759	Weakly nonlinear asymptotic models and analogs of detonation processes
Ray P. S. Han, Kai-Yuan Yeh, Guoli Liu and **Diankui Liu**	1773	Scattering of plane *SH*-waves by a cylindrical canyon of arbitrary shape in anisotropic media
M. Kumari, H. S. Takhar and **G. Nath**	1789	Unsteady mixed convection flow at the stagnation point
Announcement	i
